

Jujobi

Ecosystem Service

Be creative.
Integrate your system.
Think outside the box
and make it yours.

We want you to dream big. To be whatever you want.
Integrate your own system with our API and get a perfectly
customized solution.

The Cloud is the limit.

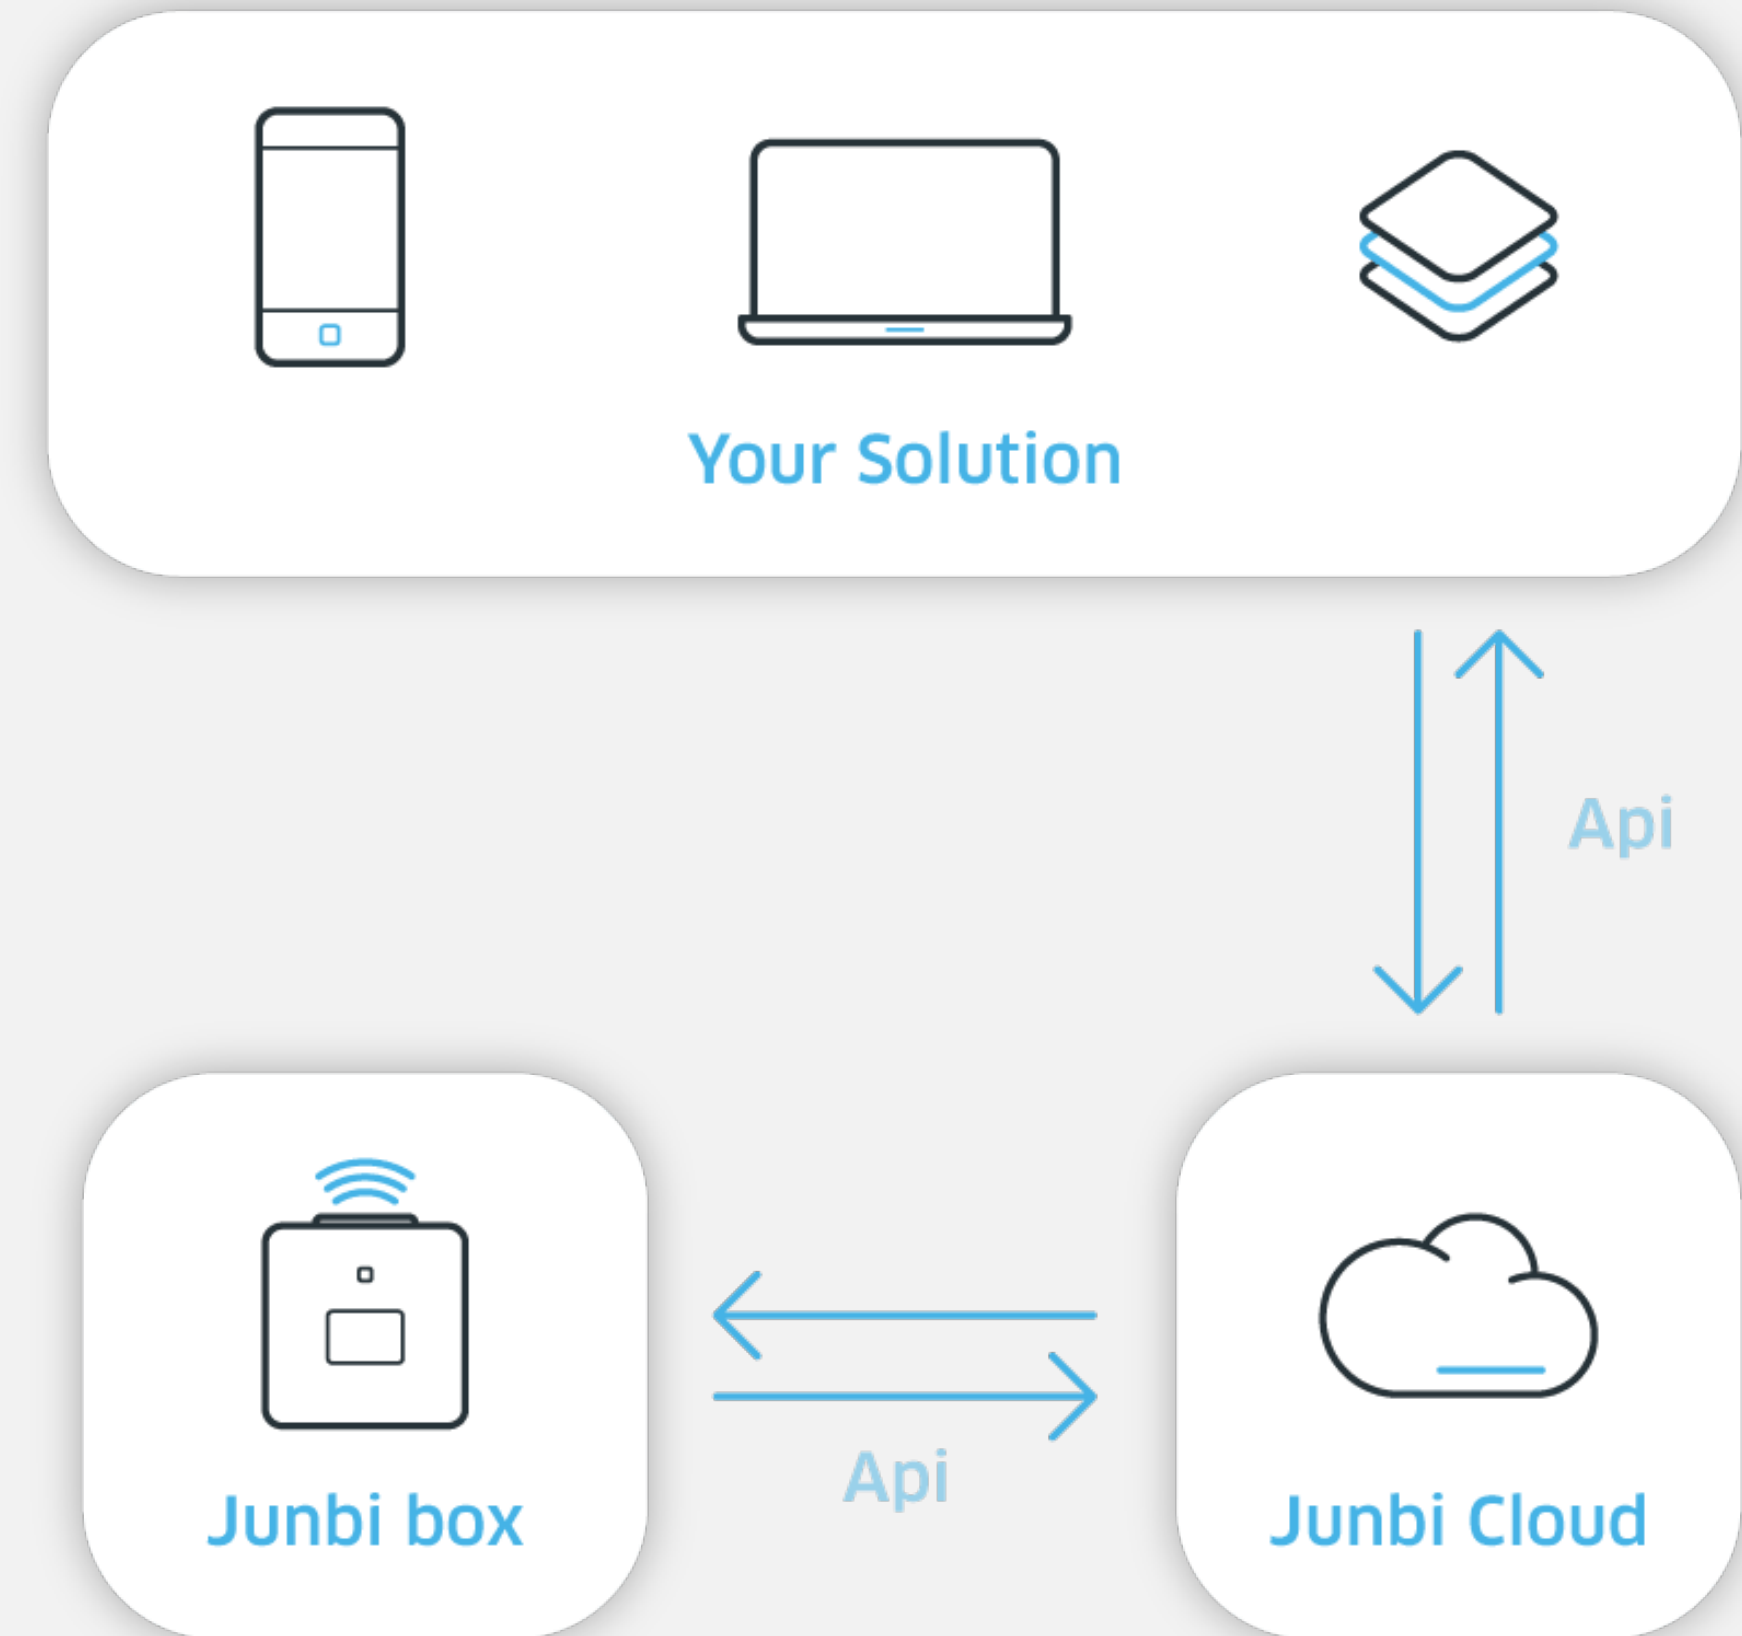

Junbi
Ecosystem

Ecosystem Features

Junbi Ecosystem

Our API allows you to integrate your systems (Web Apps, Mobile Apps, etc) through an API to our Cloud services.

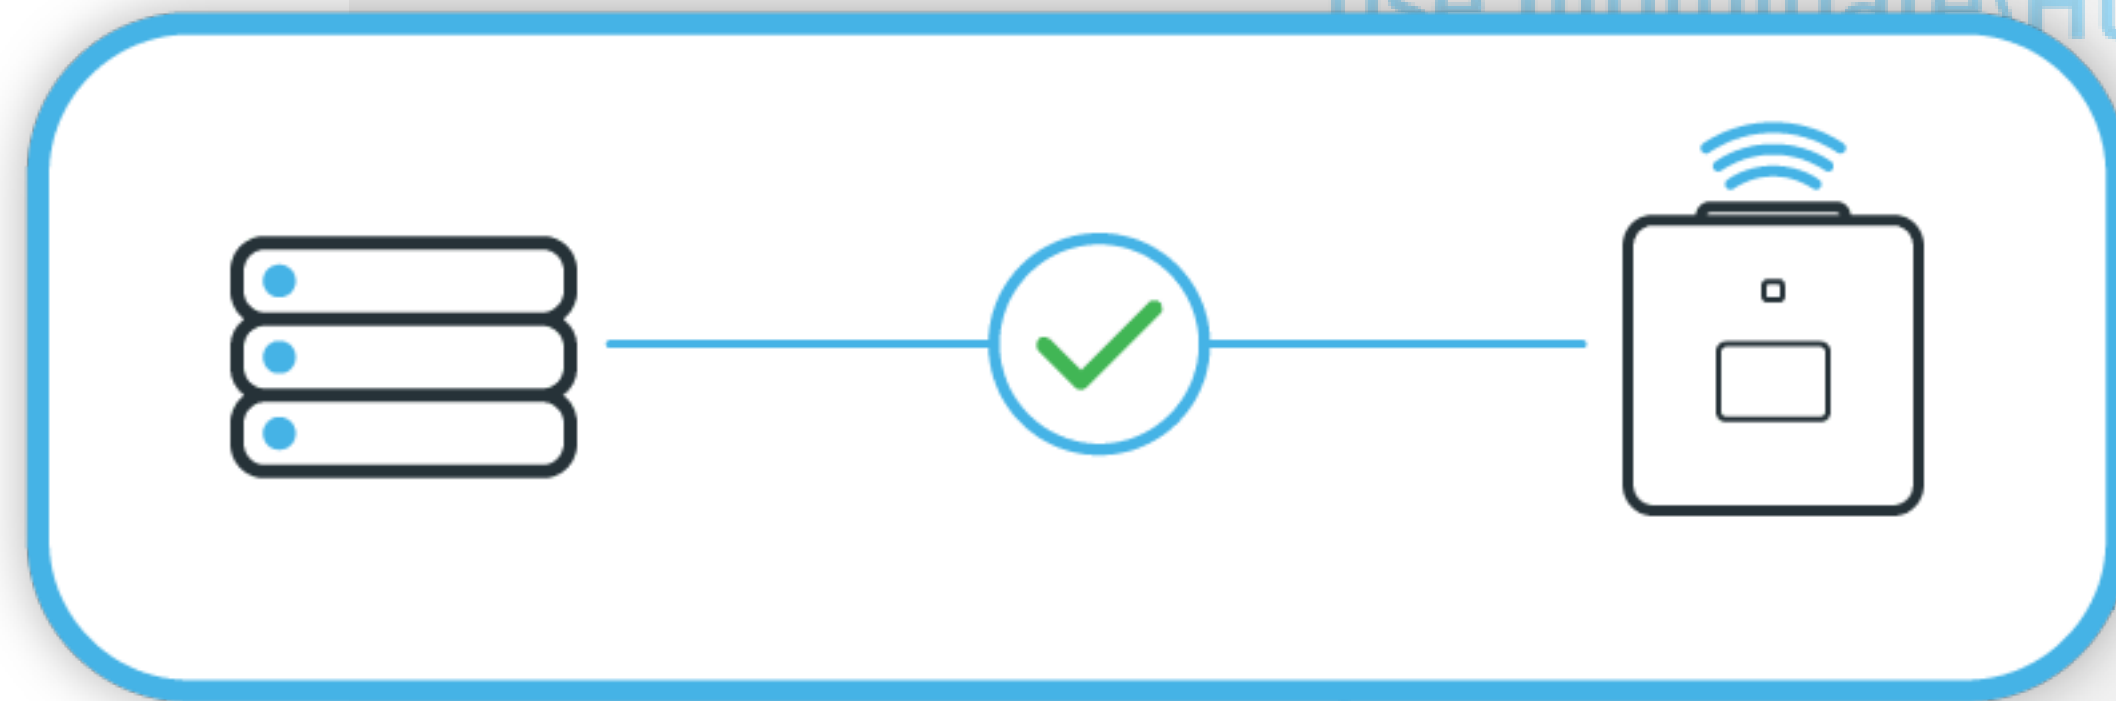

Our Cloud Services will be a communication channel for you to make your system connect to Junbi box, so you can communicate with the end users on the physical interaction points.

API Documentation

We give you the API documentation, so you can define what you want to communicate between your system and your Junbi boxes.

You can define the information associated to the Junbi QR Codes, the type of response that should be sent each time a Junbi box reads a QR Code, among others.

```
<?php
namespace App\Http\Controllers;
use Illuminate\Http\Request;
requests;
controllers\Controller
ler extends Contr
public function getPing (
{
if($user = $rec
'OK', 'ping' => time(), 'user' => $use
return respons
}
}
```

Backoffice

The Junbi API service allows you to define what you want to answer to your customers after they scan their QR Codes.

You can define not only the message that is shown on the screen, but you can also define if you want a paper to be printed or not, and which message should be printed.

**Your QR Code has
been successfully scanned.**

Case study

Case Study

Lisbon Dreams Guesthouse and Lisb'on Hostel

Lisbon Dreams Guesthouse and Lisb'on Hostel needed a mechanism for breakfast control, in order to monitor which rooms actually checked-in for breakfast and at what times.

- 1. Junbi generated QR Codes for each room**
- 2. The QR codes were placed in each room card**
- 3. Guests scan their room card on Junbi Box in order to check-in for breakfast.**

With this solution, both clients can see what are the peak hours for breakfast and how many breakfasts they really need to have available.

Jumbi

Pricing

Budget

Costs per box	Value
Junbi box	249,90€
Ecosystem Monthly Subscription	20,00 €

Legal taxes are applied to the present values.
